anyone else here buying bullion?
think the future is crypto and chipping?
think bullion is a liability if theres an economic crash?
do you like shiny rocks?

You should definitely wait until this hysteria has passed. I had some items in my shopping cart at a fairly reliable PM dealer that added up to about $1600 when the spot price of silver was in the $18 range. I was waiting for the spot to shift lower a bit before I hit checkout. As the spot price of silver plummeted to $12.35 oz., the cost of the items in my cart shot up to $2100. I emailed the company to find out WTF the deal was and was shined on about how the premiums had risen. Now, the spot on silver is around $15 or so, but the price per ounce is over $25. A $10 premium per ounce. Fuck them. This too shall pass.

Tough Call

Gold/Silver: Absolutely will be it... some day. When they day will come no one knows. Issue I find is people who saved it need money and sell it during a crisis. The value of it is based upon the market which is controlled. Countries are buying up physical gold like crazy. I do not think this will change and gold with "stay in the same area". It has been manipulated for decades to be low.

Crypto: Sounds like the future. But it is not physical. Can be seen coming in and going out when you do buy some thing. Biggest issue is the Whales. Whales accumulated so much Crypto they can play with the entire market and have. Everytime they do, they gain more power (Crypto).

Just thoughts.

It's not Wilson, it's the cycle of monetary systems, repeated over and over again, it's in the video. In order to pay for war and social programs, nations debase their currency and print more, since they need more but don't have the gold for it. This happens to nations again and again, but now it's the whole world in this position, with a worldwide monetary reset in the very near future, some say the virus is the engineered impetus.

I don’t know about you all... but because of Corona this is the first time since college that I’ve felt alive. I have lots of silver and been waiting for something like this to happen for 5 years. The point where things get so bad that 1 silver Roosevelt dime will buy me a blowjob from a formerly well to do housewife and her 18 year old daughter at the same time. I’ve been waiting in the shadows laughing at these cuck husbands who buy their wives range rovers instead of buying silver bullion... knowing that I’ll be face fucking their wives mouths for the 1.30$ it cost me to buy that silver dime.

Just yesterday at Whole Foods I seamlessly entered into conversation about Corona with a roastie milf that had a ring on her finger in the water aisle... and I said this is all a cover for trump to bring us back on a gold standard. She started looking at me in amazement like she wanted me to paint her lips in cum. At the end of the conversation I’m like take my number I have plenty of protection and freeze dried food if you ever need it and she took it from me

Yes exactly. I have a good amount of silver and gold, and it a complete SHTF scenario I know I will be better off than most, but I am not equipped to survive very long in that world. I play Halo 3 6 hours a day on a slow day, and I can barely even set up an Xbox.

I'm looking for more or less a clean reset, where I can pick up an apartment complex free and clear for 3 ounces of gold or whatever....and accept the new currency and live like a king with 75% of the residents paying me rent, and the other 25% of residents are formerly well to do housewives that I will give free rent for monthly blowjobs, so I can instead rub the merc dimes all over my body.

We are going back to pre-1913 prices levels. For most of human history a days wage equale a silver piece the size

of a silver dime. Even today in much of the world that is still true. Americans hear that some gook rice paddy farmer makes 2$ a day and they are lime OMG WTF, but thats right in line with sane hirtorical economic realitiy since that 2$ will buy you a silver dime at a coin shop. Some fatass american providing zero real value for society making 300$/day is making the equivalent of 15 ounces of silver a day if he converts his daily wage to silver, which flies in the face of all historical economic reality, and only made possible by massive inflation.

This is why a silver ounce will buy you a few months of food in venezuela, while the 20 USD that is costs you to buy that silver ounce today doesnt even buy you 2 jimmy johns sandwiches, and porves how massively we are being fucked through inflation.

People often say but muh metals will keep pace with inflation...YES...in the current fiat paradigm, but when the music stops your going to get fucking filthy rich with even just 500 ounces of silver. There is no way that you will need 1,000 or 2,000 or 4,000 ounces of silver or 100 ounces of gold to make it. You will need a fraction of that. few ounces of gold and 200 ounces of silver wil put you in the elite.

Idiot boomer gold bugs think they need 500k in gold to match 500k in fiat to protect all their wealth after the collapse. I mean if you have SHTF scenario and main street is melting down it isnt like your going to be paying your mortgage, buying 10$ gas with your silver dimes, and going thru the drive thru at starbucks with your silver quarters living life like normal while roving gangs of niggers are gangbanging white housewives in the middle of the street as you get your frappacino.

suck my dick nigger. Merica is fractured and conservatives are unironically more brainwashed than even liberals are. Liberals are unironically 1000% correct about income ineqaulity, they just have no idea how its happening. and its because we dont have sound money. Conservataives who are supposed to be constitutionalists say get a better job and get better trained and youll make more, because min wage isnt supposed to be a living wage, which is good advice but they havent read the constitutiion where it says only gold and silver shall be legal tender and only congress shall coin money.

The key is knowing when to get out of gold. In the past, you could rely on the DOW:Gold ratio. But now, with the entire dollar on the verge of crashing, I don't know if it would even be smart to ever invest again in the dow. It's like betting on America officially ending.

My heart wants America to die, and therefore just hang onto gold through thick and then until something new comes along.

My brain is telling me, that EVENTUALLY, there will be a recovery, probably years from now, but there will still be one and the DOW will eventually recover. But damn, who even knows with the virus.

>, I don't know if it would even be smart to ever invest again in the dow. It's like betting on America officially ending.

exactly, fucking idiots think theyll just buy when it crashes, not realizing this isnt a run of the mill recession, but a dollar crisis.

My dad worked for solomon bros in the 80's and been working for investment banks his whole life. Ive been telling him for 5 years to get gold and silver, and even now...after probably losing 1/3rd of his retirement he still has a deer in the headlights inaction about him. He got his MBA at the best finance school in the world and he still doesnt fucking get it.

You're taxed in the US on sale of precious metals.
"Physical holdings in gold or silver are subject to a capital gains tax equal to your marginal tax rate" but limited to 28%.
That's good if you're in the 33%, 35%, and 39.6% tax brackets.
I think the amount that's taxable is what you paid, not what it appreciated to.
That's good, but it's hardly some kind of tax-free bonanza.

I do want to know how the mines are faring though from those who have intel. The royal canadian mining sites are reportedly re-opening or have re-opened to a degree, and some more physical silver and gold appear to be showing up in stores an online sites (non auction or swaps just regular shit like jm sd and such).
Looks like there will be crunches but also some selling short term because the first peak of corona has passed a bit and regular joe will pretend shit went back to normal.
Am I correct in assuming that this first wave and responses are 'practice runs' for the future? How likely is it that this will continue until 13-15 million are gone by next year summer or so? BD was talking about vaccine being ready but I guess whoever he is negotiating with on the other side (chinks or anyone else) don't want to budge.

>>255241980

I automatically dismiss anyone who talks up any (((degree))) even a fucking middle school diploma. I need to see spines and brains, not foolishness.

BD anon shit today follow the ID in the archives.
"Why do you think we are in the middle of overthrowing the government in Venezuela? The world has changed and the U.S. will use the oil in Venezuela to secure advantages in a world that is becoming increasingly unstable. As a compliment to American oil, the combination will stabilize the U.S. for years and allow us to exit the Middle East. Once we are out of the Middle East, the Chinese will take a major role in Iran and Israel and Saudi Arabia will team up as a counter weight, crush the Iranians and we can sit in the bleachers and watch the shit storm. On another matter I predicted Barr would have some good news this month and that is unfolding with the Flynn situation and a few other things that will be coming out. One thing no one sees coming. Also Biden will not survive to be the Democrat Nominee. As I mentioned earlier there is shit percolating that will blow him out. Based on what we are hearing behind the Green Door, Hillary is like a bitch in heat and she is gearing up to get the nomination and is seriously looking at that nut case in Georgia as her running mate. Bernie and Warren are screwed because of legal problems that if surfaced will fuck both. The vaccine appears promising and without one the prediction of WW3 within 18 months holds. Folks do not get over the virus. The Virus simply goes on a nap till it gears up for many subsequent adventures. Some pretty damn horrifying. Need some sleep."

Looking dicey.

Even slabbing among the majors is suspect anymore. I mean, blue and green label PCGS-graded coins sell at a premium due to grade inflation over the years, and there's another company that will re-grade slabbed coins to render their opinion as to whether one graded MS-64 is a "high" 64 or "low" 64.

Even PCGS have established a program to regrade shit they've already graded, and their fee is based on the change in value if they upward-revise the grade.

Yeah, that's credible.
